EDUCATION

Michigan State University

Aug. 2015 - present

Ph.D. student in Computer Science & Engineering

Advisor: Dr. Jiayu Zhou

University of Science and Technology of China

Sept. 2010 - July 2014

B.E. in Electronic Information Engineering

RESEARCH INTERESTS

Reinforcement Learning, transfer learning, and data mining.

My research focuses on developing efficient reinforcement learning algorithms for large-scale real-world applications, including transportation, multi-channel marketing, and healthcare.

PROFESSIONAL EXPERIENCE

Research Intern at **Didi AI Labs, Beijing**

May. - Aug. 2017, 2018

- Designed and implemented constrained multi-armed bandit algorithm for a multi-channel marketing project. Return on Investment (ROI) increased over 23% with the same scale of investment. This algorithm is currently running online.
- Proposed and implemented a novel multi-agent deep reinforcement learning algorithm for large scale fleet management that is able to coordinate large number of agents and increase the GMV over 15% based on a simulator that is calibrated with real data.

HONORS AND AWARDS

Conference Travel Grant: SDM2016, KDD2016, SDM2017, SDM2018, KDD2018
Best Poster Award, Doctoral Forum, SDM2017

SERVICES

Program Committee (PC) member:

- 2018 IEEE International Conference on Big Data (IEEE BigData 2018)

Journal Reviewer:

- International Journal of Machine Learning and Cybernetics (JMLC)
- Neurocomputing
- Pattern Recognition
- Data Mining and Knowledge Discovery
- Transactions on Knowledge Discovery from Data (TKDD)

Conference external reviewer:

- The IEEE International Conference on Data Mining (ICDM), 2017, 2018.
